

## A. Ingredients and processing technology

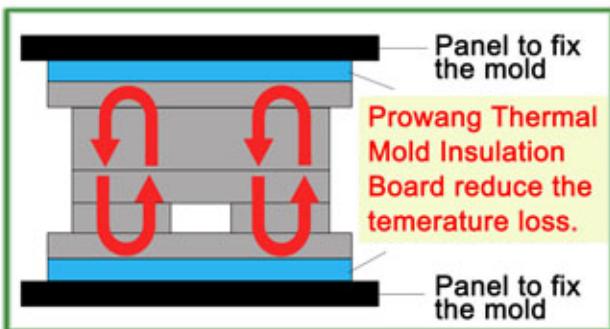

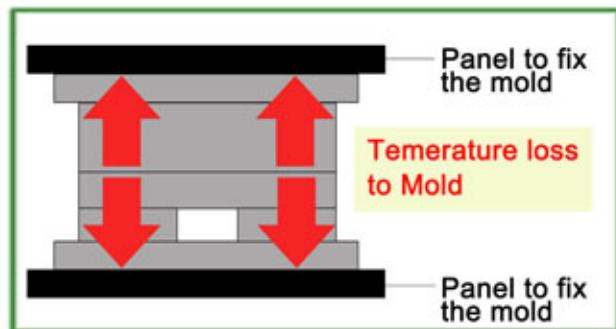

Using high temperature and high pressure molding technology, strictly select best heat resist and high pressure resist resins and enhanced glass fiber materials.

## B. Advantages and characteristics

1. Use harmless substances to the human bodies, no asbestos contents.
2. Excellent high temperature and chemical resistance, oil and water resistance.
3. High-performance compression and bending strength, no cracks and no collapse.
4. Low thermal conductivity, better heat insulation, quick heat increasing quality to shorten the heating time, precisely mould temperature control.
5. Environmental protection, reduce temperature loss and save electricity costs.
6. Long life service, save time to replace materials, enhances productivity and save maintenance costs.

## C. Processing Methods

Mold-specific insulation boards can be cut and machined using common metal tools and diamond cutting tools.

## D. Application

Widely used in hydraulic man-made board, injection machine, hydraulic machine, rubber / tire curing machine, plastic molding mold, tool and mold manufacturing.

## E. Physical performance

Test Items	Procedure	English Units	Typical Values	Metric Units	Typical Values

## F. Standard Size

- Width 1220mm x Length 2440mm
- Thickness: 5, 8, 10, 12, 15, 19, 25mm
- Accept designated cutting or CNC cutting.

## G. Inspection and Packaging

- After mass production, test each batch 200 degrees Celsius, clamping million times 150kg/cm<sup>2</sup> (1500 tons), shipment and package when test qualified.
- Carton / Pallet packing.
